Write up to five Blu-ray Discs at a time or record different data on each individual drive. at blazing speeds with the all-new Microboards Multi-Writer Blu-ray Tower!

Unlike the traditional line of CopyWriter towers that allow the copying of one master disc to a number of blank discs, the Multi-Writer is a PC-connect system that records data directly from the PC to all five combo drives. Utilizing an eSATA cable, the Multi-Writer records Blu-ray Discs, DVDs, and CDs of almost any format at top speeds.

The Multi-Writer features the very unique ability to record the same data or different data to each of the five drives simultaneously. The Multi-Writer includes Zulu2 Disc Mastering software, making it easy for you to select files to record, save and retrieve jobs, and perform other mastering tasks.

The Multi-Writer is compatible with Windows XP and Vista (32-bit only systems).

Handisc offer a range of support levels to ensure peace of mind. Blu-Ray Towers come with 1 years Back to Base warranty but this can be extended if needed. DVD Towers have a 2 year warranty as standard. We can also support or repair a system that wasn't supplied by Handisc
